## SAFETY PROVISIONS AT EL BRONCO RANCH

### VIRULOCK MASK AND OZONATION

VIRU LOCK is constructed with 3 layers of highly filtering fleece and the VIRU LOCK inner layer has an additional antibacterial and antiviral finish, which inactivates viruses and kills bacteria while attacks them specifically. The VIRU LOCK inner layer's finish envelops the virus and removes cholesterol building blocks from the phospholipid double membrane of the virus precisely. VIRU LOCK with this technique inactivates Sendai-virus in just as little as 5 minutes. VIRU LOCK reduced the rate of infection with more than 99,5% compared to the corresponding untreated nonwoven masks shortly after contact. 10 minutes after the impact the inhibition rate is already 100%. VIRU LOCK reduces the proportion of Staphylococcus aureus bacteria more than 99% compare to an untreated sample in 20 minutes. VIRU LOCK is a disposable mask and cannot be washed. VIRU LOCK masks should be disposed in it's packaging to the recyclable household waste.

We purify the interior areas with ozone generators every day. With this technology we can keep the air extremely clean. We are aware that ozonation has contraindications therefore generators are actuated if the rooms are empty.

### COMMITMENTS AND PROTOCOLS

#### • ROOMS AND PUBLIC PLACES

Inner surfaces are daily treated with disinfectants. Hand sanitizing stations are placed at the entrances. The jacuzzi and the pool are having their own automatic cleaning and disinfecting system which excludes the possibility of any infection.

Our laundry handles textiles with the necessary chemicals.

We are also using **Ozonation** which is an efficient and modern technology of cleaning inside areas.

#### • SOCIAL DISTANCING AND REQUIRED MEANS

We are using signages to remind our customers for the rules of social distancing. We recommend to avoid handshakes, hugs or any other greetings which assume direct contact.

Our extraordinary protocol provides to wear a mask in closed spaces. **Virulock** and normal masks are available at the Ranch. During the riding gloves are mandatory.

#### • SAFE OPERATION AND ENVIRONMENT

We accept only 12 guests at a time who we can accommodate in 3 different buildings. If necessary, we can provide them separate rooms. Meals can be organized at different times divided into smaller groups. Our service is buffet featured which also neutralizes any risk.

The Ranch's interior area is 3 hectares which contains 3 outside arenas and a huge riding hall. This makes possible for us to organize the lessons separately. Trails are far away from crowded places in the thousands of acres of the National Park.

WE ARE READY TO HOST YOU AGAIN!
